YouTube Analytics Dashboard using Power BI

Data Analysis & Visualization Project

Your Name : M. Venkata Krishna

Branch: CSE

Section:C2-DA

Project Overview

*This project analyzes **YouTube channel data** using Power BI.*

*It focuses on **views, subscribers, rankings, and categories**.*

*Helps understand **top-performing channels and content trends**.*

*Dashboard provides **interactive insights for decision-making**.*

Objectives

01

Analyze YouTube channel performance

02

Identify top categories and creators

03

Compare views, subscribers, and rankings

04

Build an interactive dashboard using Power BI

Dataset Description

Dataset includes:

- *Channel name*
- *Category (Music, Entertainment, Education, etc.)*
- *Total views*
- *Subscribers*
- *Rank*

Example:

- *T-Series → Highest views*
- *Cocomelon → High engagement*

Total views analyzed: ***10+ trillion***

Channel	Channel	Categories	Viewss	Views	Views
Channel	Categories	129,26,000	1,08	–	200
Calemries	Categories	Categories	2,00	=	-
Views	Category	Subscriber	6,46	[illegible]	[illegible]
Subeet Name	Categories	496,24,000	4,55	[illegible]	[illegible]
Subscriber	Subscriber	455,20,00	7,90	[illegible]	-
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]

Tools & Technologies Used

1

Power BI Desktop → Data visualization

2

Excel / Dataset file → Data source

3

Data Cleaning techniques

4

DAX (Data Analysis Expressions) for calculations

Dashboard Features

- Category-wise performance analysis
- Ranking comparison of channels
- Subscriber vs views analysis
- Filters for:
  - *Category*
  - *Channel type*
- Interactive visuals and charts

Key Insights

Music & Entertainment categories dominate YouTube

T-Series has the highest total views

Kids content (like Cocomelon) has high engagement

Some channels have high views but lower subscriber ratio

Category impacts ranking significantly

Data Visualization

- Bar charts → Category performance
- Pie charts → Subscriber distribution
- Tables → Top YouTubers
- KPI Cards → Total views, rankings

Challenges Faced

- Handling **large dataset**
- Data cleaning and missing values
- Creating meaningful relationships
- Designing user-friendly dashboard

Solutions

Used Power BI tools for data transformation

Applied filters and slicers for clarity

Optimized visuals for better understanding

Slide 11: Future Scope

- *Add **real-time YouTube data***
- *Include **AI-based predictions***
- *Improve dashboard with **advanced analytics***
- *Add more metrics like likes, comments*

Slide 12: Conclusion

- *Successfully built an **interactive YouTube analytics dashboard***
- *Gained insights into **content trends and performance***
- *Power BI proved effective for **data visualization and analysis***

Thank You
